Monthly Indicators

January 2019

Despite a strong U.S. economy, historically low unemployment and steady wage growth, home sales began to slow across the nation late last year. Blame was given to a combination of high prices and a steady stream of interest rate hikes by the Federal Reserve. This month, the Fed responded to the growing affordability conundrum. In a move described as a patient approach to further rate changes, the Fed did not increase rates during January

New Listings were down 3.4 percent to 28. Pending Sales increased 72.0 percent to 43. Inventory shrank 16.7 percent to 100 units.

Prices were still soft as Median Sales Price was down 35.6 percent to \$82,400. Days on Market increased 45.2 percent to 122. Months Supply of Homes for Sale was down 27.1 percent to 3.5 months, indicating that demand increased relative to supply.

While the home affordability topic will continue to set the tone for the 2019 housing market, early signs point to an improving inventory situation, including in several markets that are beginning to show regular year-over-year percentage increases. As motivated sellers attempt to get a jump on annual goals, many new listings enter the market immediately after the turn of a calendar year. If home price appreciation falls more in line with wage growth. and rates can hold firm, consumer confidence and affordability are likely to improve.
